#38017

System Includes:

- Backup Pump
- Battery Case
- Activation Switch
- Control Panel/Alarm
- Charger Unit
- Check Valve
- Plumbing and mounting components
- AC Power Supply

Are your pumps prepared for a power outage?

The Stormcell™ Battery Back-up Pump provides uninterrupted flood control for basements during a power outage or main pump failure. It is one of the most advanced pump systems on the market, and features high-output pumping, an energy efficient DC pump for longer run times, and professional-grade charger/controllers. It also includes high performance 12-volt batteries that are USA made and designed for optimum performance in backup pump applications. This pump will help you feel secure knowing that you have a fail safe plan in case of emergency.

Remote wall-mount user interface with LCD display

Control Panel features a super bright LED alarm ring to notify you that the backup pump is in use. Other notifications include: high water, AC power lost, Blown Fuse/DC pump failure, 12-volt battery charge levels, critically low battery warning, and user set basement temperature warning.
