

BLOCK-AIDE

Out of Service Sign and Lock For Partition Stalls

#16764

Size: 5/8"H x 3"W x 1-1/2"D

This clever item slides down between the pilaster and partition door to lock patrons out of a stall that is out of order. It's much more professional looking than a makeshift cardboard sign or a trash bag. Not only does Block-Aide provide a prominent alert that the stall is not usable, it also prevents patrons from entering the stall and seeing the broken fixture, leaving them with a bad impression of your establishment. Block-Aide fits most

partition doors, is reusable, and is also chip and crack resistant. It's a very effective, sanitary, and more attractive method of notifying customers of a maintenance issue. Give Equiparts a call and order Block-Aide *before* you need it!

Locks Users Out • Reusable • Professional Impression • Eye-Catching Alert
