

COMPLETE CAFE EQUIPMENT SANITIZER

Say Goodbye to Bitter Coffee and Hello to Clean Cafe Equipment

Want better tasting coffee?

Use Complete Cafe Equipment Sanitizer in your coffee equipment! Coffee beans are oily and create build-up in coffee machines. This makes coffee taste bitter over time.

Using Complete Cafe Equipment Sanitizer on & around coffee, tea and other cafe style equipment will not only make beverages from those machines taste better, but it also sanitizes them. It cycles through auto-frothers, as well as traditional steam wands and steel pitchers, for easy cleanup. Built-in measuring device allows for easy portioning and PPM control.

This sanitizer can be used on the following items:

- Coffee Urns
- Coffee Pots
- Hot Water Dispensers
- Tea Dispensers
- Milk Dispensers
- Ice Machines

#7995E **#79955**
 32-ounce bottle Case of 6

SANITIZER TO WATER RATIO: Use .25 oz. per gallon of water to create a 200 ppm solution.

Complete Cafe Equipment Sanitizer can be shipped via UPS
