

FREEZ ICE MACHINE CLEANER

For use on all Commercial Ice Systems

The U.S. Food and Drug Administration (FDA) defines ice as food, which means that ice machines need to be regularly cleaned. Ice machines must be cleaned and sanitized at the frequency recommended by the manufacturer of the ice machine used, which is generally at least 2 to 4 times per year.

#79954E
14-ounce bottle

#79954
Case of 12

- Nickel safe formula based on citric acid.
- Each bottle contains 5 cleaning doses.
