

# SLOAN OFFSET ADAPTER

*Install Grab Bars Above Flushometer  
Without Relocating the Inlet Pipe*

**SLOAN**

**#48691** (H1018A)

- Updates flushometers to enable ADA grab bar installation
- Lowers total height of flushometer by 1-1/2"
- Avoids costly wall modifications
- Includes mud guard and flange for easy installation
- Extensively tested for optimal performance and pressure
- Standard 1" NPT connection to the control stop

Sloan's new Offset Adapter for G2, SOLIS®, and ECOS® Flushometers helps keep your facilities accessible. This unassuming adapter creates enough space for an ADA-compliant grab bar by lowering the total height of the flushometer by 1-1/2 inches without having to relocate the water supply inlet pipe. It's a simple update that saves your facility from the costs and complexities of opening walls or workarounds like split grab bars.
