

SILVER DEFENDER TAPE

Antimicrobial Protected Surface Film

Silver Defender is a self-cleaning antimicrobial protected film that is built for high-touch, high traffic areas. They are waterproof, resistant to most cleaning products, and can be applied to surfaces across the industries.

These films are embedded with silver ions that provide a cleaning power that is activated by light, air pressure, and touch. They protect against microorganisms, bacteria, mold, mildew, and fungi for up to 90 days.

Features:

- Embedded with Silver-ions
- Can be installed on most smooth surfaces
- Waterproof
- Resistant to most cleaning products
- For high-touch areas
- Easy to apply and remove
- Last up to 90 days
